# FEABHAS
EMBEDDING SOFTWARE COMPETENCE

Feabhas training supports ARM employees & ARM® technology users

ARM

A UK success story in embedded software development.

90 billion

ARM-based chips shipped to date

The Feabhas-ARM partnership timeline

1998

First ARM employee attends a Feabhas training course.

Delegates attend public courses held in the UK.

2009

ARM requires courses with customised content, deliverable across more locations.

2016

500 ARM engineers receive Feabhas training in last 5 years.

2015

137 engineers attend a Feabhas course.

2011

Token scheme introduced.

32 engineers attend a Feabhas course.

Benefits of the ARM - Feabhas token scheme

Easy for both ARM and Feabhas to plan and schedule training

Simplifies the training purchase process

Tokens used to book courses & adapt content

Feedback shows ...

Delegates value the quality of the Feabhas lectures and hands-on exercises

ARM management appreciates the smooth booking process that Feabhas customers have come to expect.

Since the introduction of ARM's Learning & Development Management System ....

Delegates can easily find a course that meets their needs .....

Feabhas takes care of all the booking details

Public courses for individuals

On-site courses for teams

Delegates receive high quality training

ARM know the course will run smoothly
